# CONTENT

- Workshops

- Media

- Educational Programs

# WORKSHOPS

How to get hired easily? - Presentation skills, CV writing and business documentation

- The goal of this educational program is to present a simple and practical advice that will assist young surveyors in the preparation of important and memorable presentation, well-written resumes and mastering business documents.

# WORKSHOPS

## Virtual Animation Modeling in Blender

### AIM?

- To educate young surveyors for work in Blender and encourage their creativity and imagination to graphically display the elements of art in interactive 3D graphics software.

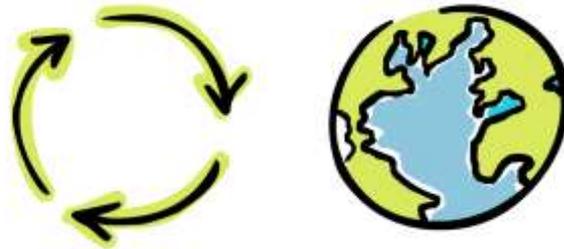

### THEME?

- The theme of the animation is "**Croatian heritage through an eye of a Geodetic Engineer**"

# EDUCATIONAL PROGRAM

## International Whole-day Seminar for Students: Roles of Geodesy and Geoinformatics in Sustainable Development

*HOW can urban development follow the technological advancement without having a negative impact on the environment?*

# International Whole-day Seminar for Students: Roles of Geodesy and Geoinformatics in Sustainable Development

*The aim is to encourage self-awareness of young surveyors on the issue of the future and to achieve creativity in creating innovative solutions as well as new thinking in order for the young generation to give their contribution to the society.*

# MEDIA

In today's modern world, the media are essential elements of public information systems used for dispensing news and audio-visual content for the purpose of informing and educating the population.

The media have great influence in society and largely serve to connect the world. Technological development is the easiest and fastest way to transmit news, thus allowing easier access to desired information.

# NETWORKING!

# Students' portal

*The aim is to enlarge interest of the public in geodesy and geoinformation and expand their horizons, increase communication, interaction and openness to young surveyors of the Faculty and consolidate all of the powerful media of our time - the Internet, via web portal.*

# GEOF.TV

- Television combines the picture and sound of today's most influential media. The TV image carries the most complete and most succinctly information, more powerfully than any other media on the consciousness of recipients.
- The plasma set over the Student Office of the Faculty will be running a number of textual and visual content with the goal of informing young surveyors about the latest information.

# VIRTUAL MUSEUM & VIRTUAL WALK

- Geodesy as a science is very old and it dates back to the Ancient Greece and Eratosthenes. In Croatia there is no Museum which exhibits only instruments and similar artifacts of geosciences.

***Aim:***

*to interest people to search and learn more about history of Geodesy,  
to open their hearts to it, as well as their mind.*

**CONCLUSION?**

**Thank you for your attention!**
